NMID: 85E6F0516B67179955840F96BF981824

1. Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

The screenshot shows the Salesforce Setup interface for creating a new custom object. The page title is "New Custom Object". A yellow banner at the top states: "Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more!](#) [Don't show this message again](#)". Below the banner, the "Custom Object Definition Edit" section is active, showing "Custom Object Information". The form includes the following fields:

- Label:** Nickname (Example: Account)
- Plural Label:** Nicknames (Example: Accounts)
- Starts with vowel sound:** ☐
- Object Name:** Nickname (Example: Account)
- Description:** (Empty text area)
- Context Sensitive Help Setting:** ☒ Open the standard Salesforce.com Help & Training window, ☐ Open a window using a Visualforce page
- Content Name:** --None--

At the bottom, there are buttons for "Save", "Save & New", and "Cancel". The footer text reads "Enter Record Name Label and Format".

This screenshot shows the same Salesforce Setup interface for creating a new custom object, but with the "Role" example selected. The form fields are populated as follows:

- Label:** Role (Example: Account)
- Plural Label:** Roles (Example: Accounts)
- Starts with vowel sound:** ☐
- Object Name:** Role (Example: Account)
- Description:** (Empty text area)
- Context Sensitive Help Setting:** ☒ Open the standard Salesforce.com Help & Training window, ☐ Open a window using a Visualforce page
- Content Name:** --None--

The "Save", "Save & New", and "Cancel" buttons are still present at the bottom. The footer text "Enter Record Name Label and Format" remains the same.

Sharing Setting

Select the minimum access level required on the Master record to create, edit, or delete related Detail records.

☐ Read Only: Allows users with at least Read access to the Master record to create, edit, or delete related Detail records.

☒ Read/Write: Allows users with at least Read/Write access to the Master record to create, edit, or delete related Detail records.

Allow reparenting

☐ Child records can be reparented to other parent records after they are created.

Auto add to custom report type

☒ Add this field to existing custom report types that contain this entity.

Lookup Filter

Optionally, create a filter to limit the records available to users in the lookup field. [Tell me more!](#)

Help for this Page

Step 1. Choose the field type

Step 1

Next

Cancel

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected

Select one of the data types below.

☐ Auto Number

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

☐ Formula

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

☒ Roll-Up Summary

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

☐ Lookup Relationship

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

☐ Master-Detail Relationship

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

☐ External Lookup Relationship

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Roll-Up Summary Options

Data Type	Roll-Up Summary	Summary Type	COUNT
-----------	-----------------	--------------	-------

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply th Security for the users

The screenshot shows the Salesforce Setup interface. The left sidebar has a search bar with 'PROF' and a 'Profiles' link under the 'Users' section. The main content area is titled 'Clone Profile' and includes a sub-header 'Clone Profile - Salesforce - Developer Edition' and a 'Help for this Page' link. Below the header, there is a prompt 'Enter the name of the new profile.' and a required information section 'You must select an existing profile to clone from.' This section contains a table with the following data:

Existing Profile	Customer Community Login User
User License	Customer Community Login
Profile Name	user a

At the bottom of the form are 'Save' and 'Cancel' buttons.

3. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

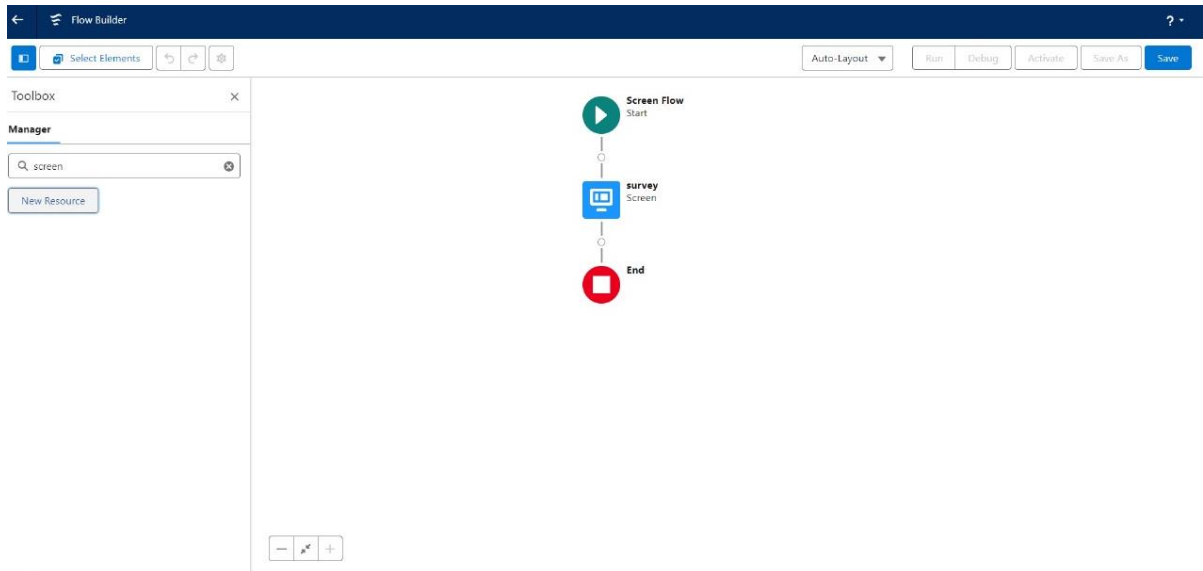

The first screenshot shows the 'Select Users to Assign' page in Salesforce Setup. The breadcrumb trail is '... > PERMISSION SET 'USER A' > MANAGE ASSIGNMENT EXPIRATION'. The page title is 'user A'. The left sidebar shows the navigation menu with 'Permission Sets' selected. The main content area shows a list of users to assign. The 'All Users' dropdown is expanded, showing 1 item selected. The table below lists the users:

	Full Name	Alias	Username	Role	Ac...	Profile
<input type="checkbox"/>	Chatter Exper	Chatter	chatty.00d5j00000d3k6seav.7eozx53qymcm@chatter.salesforce.com		<input checked="" type="checkbox"/>	Chatter Free User
<input type="checkbox"/>	Integration U:	integ	integration@00d5j00000d3k6seav.com		<input checked="" type="checkbox"/>	Analytics Cloud Integration User
<input checked="" type="checkbox"/>	Security User	sec	insightssecurity@00d5j00000d3k6seav.com		<input checked="" type="checkbox"/>	Analytics Cloud Security User

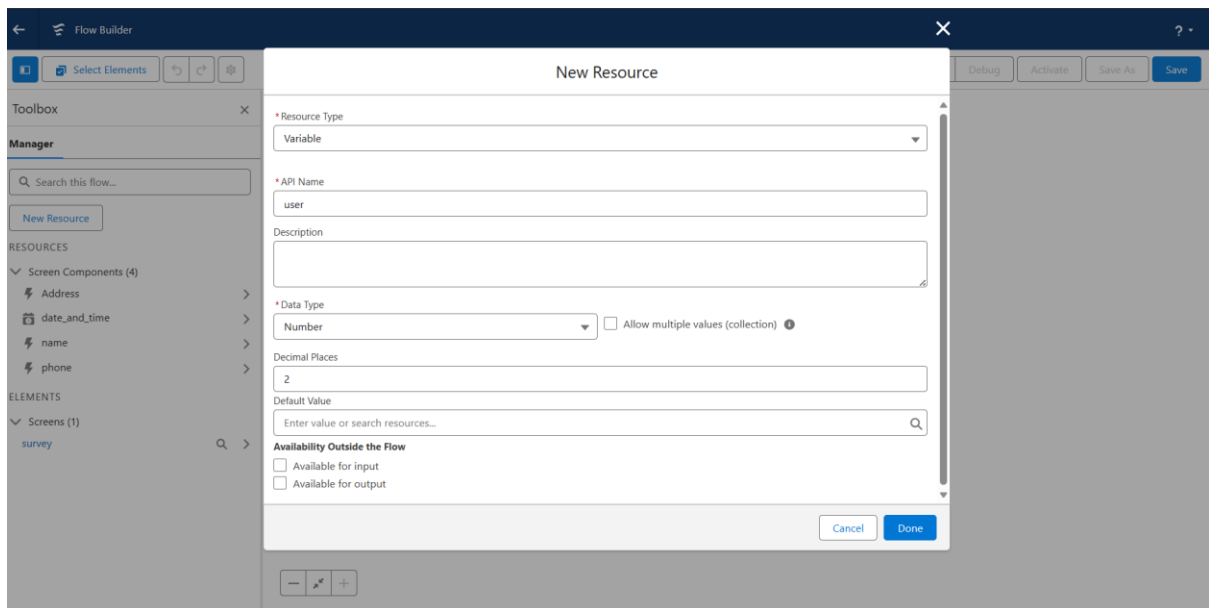

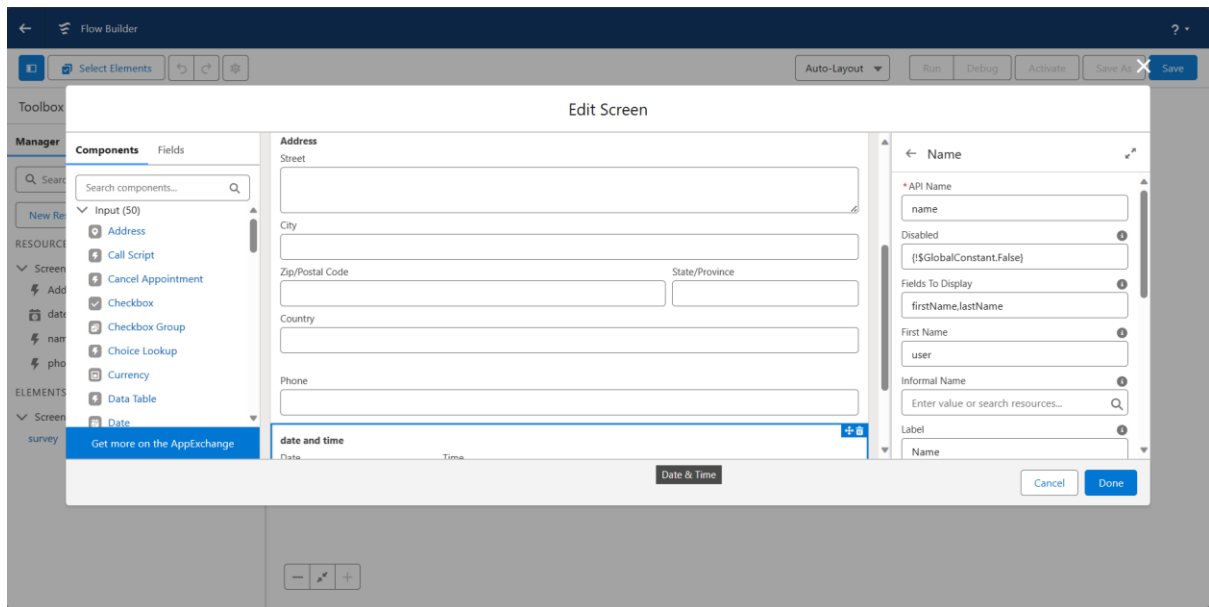

The second screenshot shows the 'Select an Expiration Option For Assigned Users' page. The breadcrumb trail is '... > PERMISSION SET 'USER A' > MANAGE ASSIGNMENT EXPIRATION'. The page title is 'user a'. The left sidebar shows the navigation menu with 'Permission Sets' selected. The main content area shows options for selecting an expiration date. The 'No expiration date' option is selected. The 'Specify the expiration date' option is also visible with a dropdown for 'Time Zone'. The 'Selected Users' table shows the user assigned:

Full Name	Role	Profile	Active	User License	Expires On
Security User		Analytics Cloud Security User	<input checked="" type="checkbox"/>	Analytics Cloud Integration U...	Never Expires

4. Create a screen flow for a basic survey to fill in the details for any form.

The screenshot shows the 'Edit Screen' dialog box. The 'Components' tab is active, displaying a list of components: 'Input (50)', 'Address', 'Call Script', 'Cancel Appointment', 'Checkbox', 'Checkbox Group', 'Choice Lookup', 'Currency', 'Data Table', and 'Date'. The 'Name' component is selected, and its configuration is shown in the 'Fields' section. The 'Name' field is set to 'user', and the 'Last Name' field is set to 'a'. The 'Address' field is set to 'Street'. The 'City' field is set to 'City'. The 'Fields To Display' section shows 'firstName.lastName'. The 'First Name' field is set to 'user', and the 'Informal Name' field is set to 'Enter value or search resources...'. The 'Label' field is set to 'Name'. The 'Done' button is highlighted.
